¹ Quarter values represent the following:

1 - percentage of students who scored in the lowest quarter of the national distribution (1-25)

2 - percentage of students who scored in the second quarter of the national distribution (26-50)

3 - percentage of students who scored in the third quarter of the national distribution (51-75)

4 - percentage of students who scored in the fourth quarter of the national distribution (76-99)

² Percent rates only include students that participated in the exams.

³ Participation rate is calculated by dividing the total count of students tested by the October 1 enrollment.

¹ Quarter values represent the following:

- 1 - percentage of students who scored in the lowest quarter of the national distribution (1-25)
- 2 - percentage of students who scored in the second quarter of the national distribution (26-50)
- 3 - percentage of students who scored in the third quarter of the national distribution (51-75)
- 4 - percentage of students who scored in the fourth quarter of the national distribution (76-99)

² Percent rates only include students that participated in the exams.

³ Participation rate is calculated by dividing the total count of students tested by the October 1 enrollment.

¹ Quarter values represent the following:

- 1 - percentage of students who scored in the lowest quarter of the national distribution (1-25)
- 2 - percentage of students who scored in the second quarter of the national distribution (26-50)
- 3 - percentage of students who scored in the third quarter of the national distribution (51-75)
- 4 - percentage of students who scored in the fourth quarter of the national distribution (76-99)

² Percent rates only include students that participated in the exams.

³ Participation rate is calculated by dividing the total count of students tested by the October 1 enrollment.

¹ Quarter values represent the following:

1 - percentage of students who scored in the lowest quarter of the national distribution (1-25)

2 - percentage of students who scored in the second quarter of the national distribution (26-50)

3 - percentage of students who scored in the third quarter of the national distribution (51-75)

4 - percentage of students who scored in the fourth quarter of the national distribution (76-99)

² Percent rates only include students that participated in the exams.

³ Participation rate is calculated by dividing the total count of students tested by the October 1 enrollment.

¹ Quarter values represent the following:

1 - percentage of students who scored in the lowest quarter of the national distribution (1-25)

2 - percentage of students who scored in the second quarter of the national distribution (26-50)

3 - percentage of students who scored in the third quarter of the national distribution (51-75)

4 - percentage of students who scored in the fourth quarter of the national distribution (76-99)

² Percent rates only include students that participated in the exams.

³ Participation rate is calculated by dividing the total count of students tested by the October 1 enrollment.

¹ Quarter values represent the following:

1 - percentage of students who scored in the lowest quarter of the national distribution (1-25)

2 - percentage of students who scored in the second quarter of the national distribution (26-50)

3 - percentage of students who scored in the third quarter of the national distribution (51-75)

4 - percentage of students who scored in the fourth quarter of the national distribution (76-99)

² Percent rates only include students that participated in the exams.

³ Participation rate is calculated by dividing the total count of students tested by the October 1 enrollment.

¹ Quarter values represent the following:

1 - percentage of students who scored in the lowest quarter of the national distribution (1-25)

2 - percentage of students who scored in the second quarter of the national distribution (26-50)

3 - percentage of students who scored in the third quarter of the national distribution (51-75)

4 - percentage of students who scored in the fourth quarter of the national distribution (76-99)

² Percent rates only include students that participated in the exams.

³ Participation rate is calculated by dividing the total count of students tested by the October 1 enrollment.

¹ Quarter values represent the following:

1 - percentage of students who scored in the lowest quarter of the national distribution (1-25)

2 - percentage of students who scored in the second quarter of the national distribution (26-50)

3 - percentage of students who scored in the third quarter of the national distribution (51-75)

4 - percentage of students who scored in the fourth quarter of the national distribution (76-99)

² Percent rates only include students that participated in the exams.

³ Participation rate is calculated by dividing the total count of students tested by the October 1 enrollment.

¹ Quarter values represent the following:

1 - percentage of students who scored in the lowest quarter of the national distribution (1-25)

2 - percentage of students who scored in the second quarter of the national distribution (26-50)

3 - percentage of students who scored in the third quarter of the national distribution (51-75)

4 - percentage of students who scored in the fourth quarter of the national distribution (76-99)

² Percent rates only include students that participated in the exams.

³ Participation rate is calculated by dividing the total count of students tested by the October 1 enrollment.

¹ Quarter values represent the following:

1 - percentage of students who scored in the lowest quarter of the national distribution (1-25)

2 - percentage of students who scored in the second quarter of the national distribution (26-50)

3 - percentage of students who scored in the third quarter of the national distribution (51-75)

4 - percentage of students who scored in the fourth quarter of the national distribution (76-99)

² Percent rates only include students that participated in the exams.

³ Participation rate is calculated by dividing the total count of students tested by the October 1 enrollment.

¹ Quarter values represent the following:

1 - percentage of students who scored in the lowest quarter of the national distribution (1-25)

2 - percentage of students who scored in the second quarter of the national distribution (26-50)

3 - percentage of students who scored in the third quarter of the national distribution (51-75)

4 - percentage of students who scored in the fourth quarter of the national distribution (76-99)

² Percent rates only include students that participated in the exams.

³ Participation rate is calculated by dividing the total count of students tested by the October 1 enrollment.
